Experience

Ford Motor Private Limited - Chennai

Senior Technical Architect | Nov 2024 - Present

- **Software Skills:** Next.js, React, Micro Frontend, Monorepo, Dynatrace, Module Federation
- **Description:** E-commerce web development for Ford non-vehicle purchases in North America.
- **Roles & Responsibilities:** Manage code quality, infrastructure, and architecture of micro-frontend applications
- Provide technical leadership for tech leads and engineers
- Site reliability engineering and governance
- Lead automation testing and design
- Provide mentorship and technical guidance for team members

Lowe's India - Bangalore

Senior Software Engineer | Aug 2021 - Nov 2024

- **Software Skills:** React.js, Express, Hapi, Node.js, GCP, Spinnaker, Jenkins, Camunda
- **Description:** Enhanced the digital e-commerce experience of Lowes.com through improved user experience and new features, collaborating with Product and UX teams to design reusable components following Atomic Design System architecture.
- **Roles & Responsibilities:** Lead the team with solutions and direction, perform code reviews, and represent the team in solution design meetings
- Design and develop new and critical enhancements
- Provide deployment strategies and safe releases by managing infrastructure resources and canary deployments

IBM India - Bangalore
Software Engineer | Feb 2021 - Aug 2021

- **Software Skills:** Angular, Carbon Design System, Docker, Micro Front End Architecture
- **Description:** Developed the user interface for IBM's Multi Cloud Management Platform, which supports hybrid cloud management.
- **Roles & Responsibilities:** Design UI architecture based on product requirements
- Develop the UI and enable the team to build with Angular and Carbon Design System
- Provide design inputs for backend microservice architecture

Tata Consultancy Services - Chennai & Atlanta, GA, USA
IT Analyst | Sep 2012 - Jan 2021

- **Major Clients:** The Home Depot, NAPA Auto Parts
- **Software Platforms:** Java Hybris, Vue.js, Angular, React, Node.js APIs, JavaScript, jQuery, Handlebars.js, RequireJS, Spring
- **Description:** Trained as a Java developer and expanded into B2B and B2C e-commerce web applications using single-page application frameworks, multi-tier microservice APIs, SAP Hybris e-commerce applications, and point-of-sale domains.
- **Roles & Responsibilities:** Lead onsite teams and deliver offshore team commitments
- Architect application design and provide direction to development teams
- Collaborate with UX and product teams to gather requirements and conduct grooming
- Design, develop, and analyze Adobe Analytics implementations

Education

Bachelor of Engineering (Electronics & Communication Engineering)
Sri Sairam Engineering College, Anna University - Chennai, India
